In branch

in marte-rv.2.1 16 hours ago

modules/vm-linux/main.tf:20

```
17  network_interface_ids      = [azurerm_network_interface.nic.id]
18  size                       = var.vm_size
19  admin_username             = var.admin_username
20  admin_password             = var.admin_password
```

This line contains a potential high severity misconfiguration affecting the Compute
Snyk IaC

```
21  disable_password_authentication = var.disable_password_authentication
22
23  source_image_reference {
```

Tool

Snyk IaC

Rule ID

SNYK-CC-TF-263

The issue is...

Administrative password has been set in configuration file
